GEMICATES Lets you Control

SAFETY

Security is concern to any homeowner, thats why gemicates provides an extensive range of sensors and modules that can be integrated within your preexisting security system.

Turn your home into a castle

Presence Simulation

This makes it look like you're home, even when you're away.

Surveillance

Real time images from surveillance cameras can be directly to a user's Android or iOS device anytime and to anywhere on the planet.

Door Locks

If you integrate a smart door lock into your automation system, when different entrance codes are input, different scenes can be triggered.

Emergency Button

If pressed an alarm will be triggered and predesignated people will be contacted via text message.

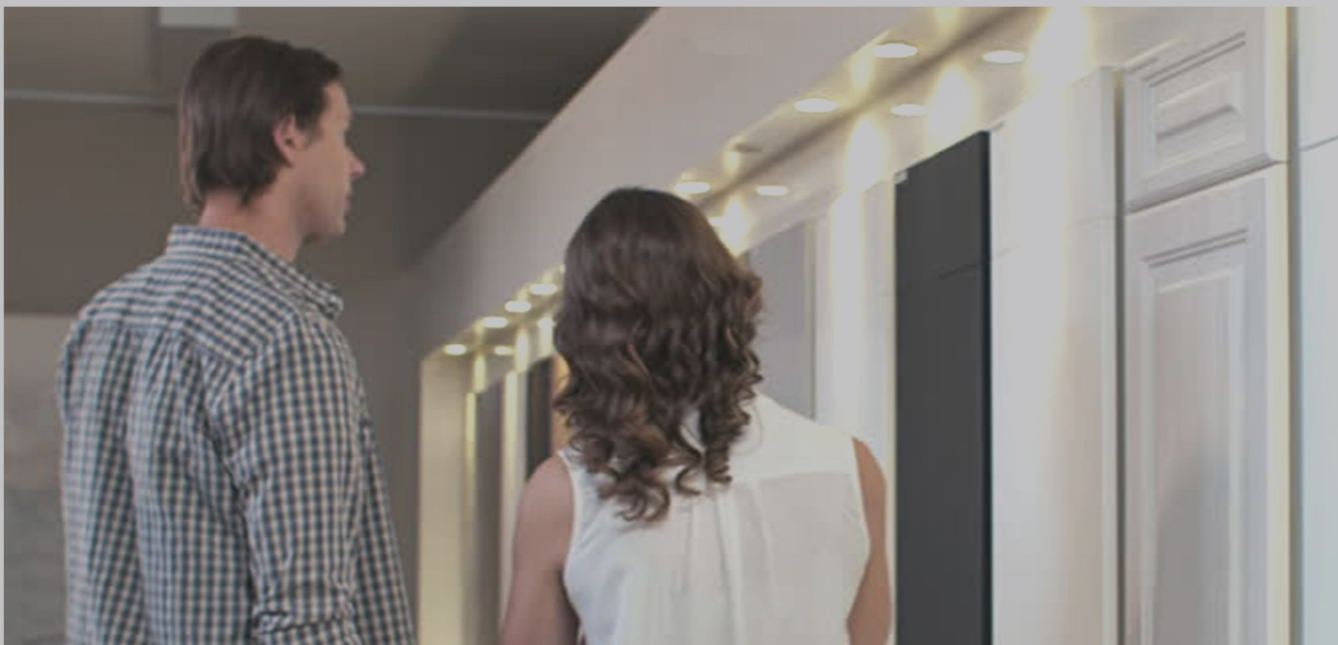

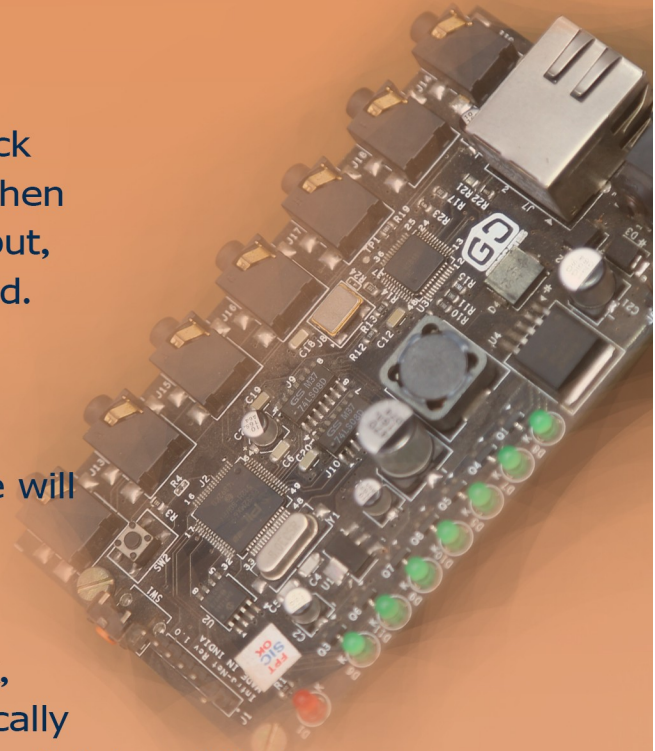

Gas Detection

If the system detects a gas leak, the gas supply will be automatically deactivated and the owner immediately notified.

Smoke Detection

When a smoke detector is triggered, a voice alarm will be sounded and a text message sent to the occupants.

COMFORTABLE

When a home automation system takes care of you, comfort and convenience becomes standard

Mood Lighting

With Lighting automation you can instantly adjust your illumination to suit any situation or atmosphere.

EASY CONTROL

ON/OFF Control

Control your lights remotely from anywhere in the world. When you are connected to the internet you can make it seem like you're home, even when you are not.

RGB Control

Colored lighting is for party and decorations, which can be instantly made to produce aesthetic look and lighten up your mood with mesmerising color combo by gently varying the tempo.

Scene Control

scene can be smart security ideas to secure your home or a mood based a scene or scene to throw a party or a climate based scene or scene to arrange a movie in your home theatre system. Totally, a scene performs what a user wants collectively on a single tap, it controls everything.

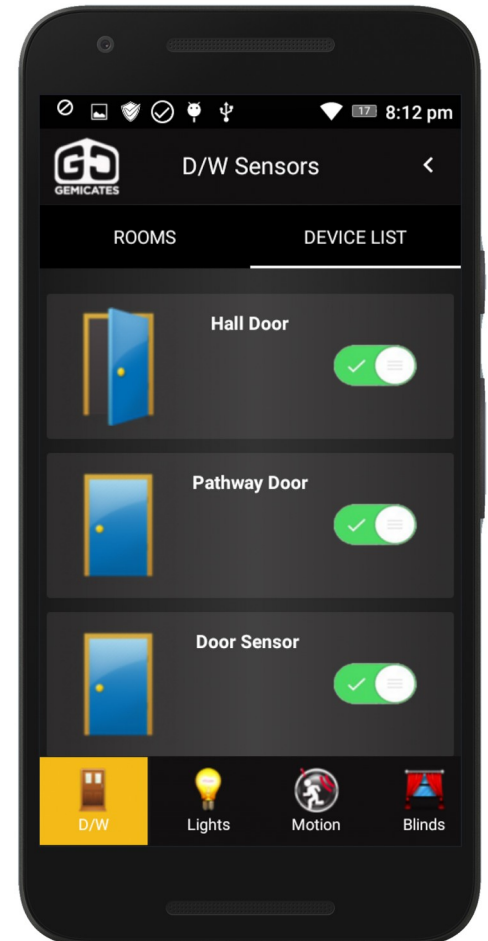

Voice Control

Via the app your home can be completely voice controlled. By sending a voice command, lights can be turned on or off, the temprature set, blinds and shutters opened and closed, and all appliances managed

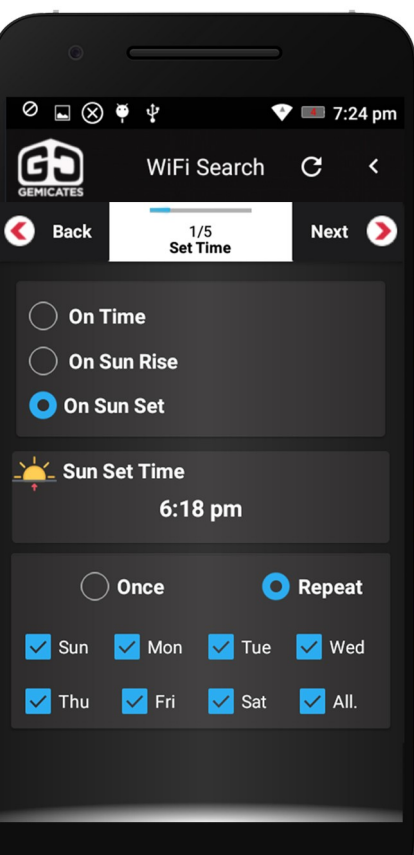

Remote Monitoring

Working in conjunction with the automation system, the Hagway app enables remote control, appliance control and security system management.

Timed Event

Timed events can be set which enable the system to carry out pre-specified tasks automatically.

ENERGY EFFICIENT

With efficient automated utility management, every home regardless of size or age can see a dramatic reduction in energy consumption.

With unique range of Gemicates software and hardware though, any home can effortlessly achieve maximum efficiency.

Lighting Control

If a system register that a room is vacant the lighting will be automatically deactivated

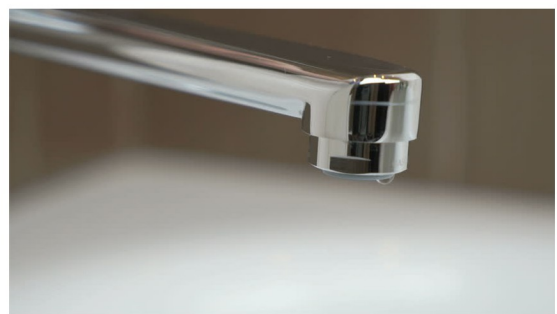

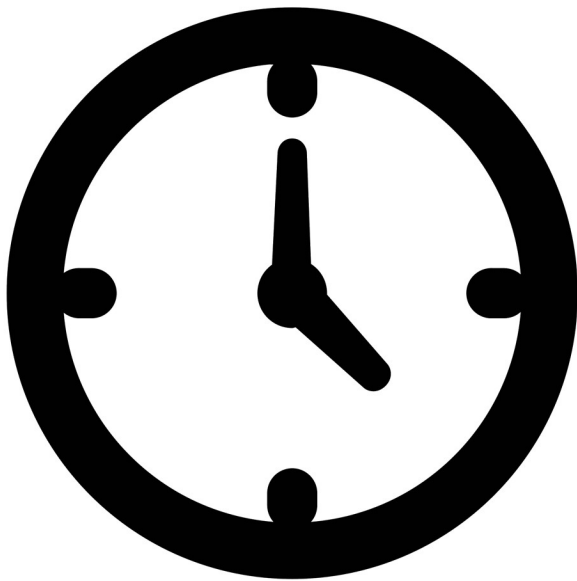

HVAC Control

With dynamic HVAC control, heating or cooling devices work with the external environment.

Timers

Events can be programmed to be activated at set times by the user, this enables devices to be activated and deactivated with no external input.

Logic control

With built in logic units, Gemicates are truly smart. This enables the system to activate devices and appliances when a presence is detected, and deactivate them when the area is vacated.
